

ARIS CADENCE COLLECTION

Aris Cadence is a collection of decorative panels for interior and exterior that offers great versatility, being able to be installed both vertically and horizontally. A collection designed to change the look of any space, from kitchens, living rooms and bathrooms to terraces or facades.

For interiors, it brings warmth and comfort to the environment and for outdoor spaces, it offers greater resistance to atmospheric conditions.

Cadence was born with the idea of transmitting dynamism and positivity. With an asymmetrical and uneven design, it generates a set of design and avant-garde that leaves no one indifferent. This is a clear commitment to differentiated and unique spaces.

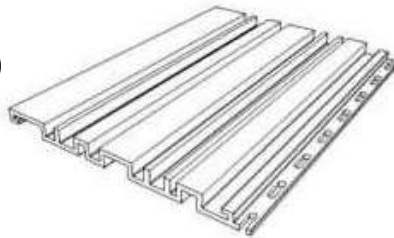

COMPOSITION

Manufactured with Eco-fiber Composite, a WPC composed mainly of polyvinyl chloride, 50% rice husk and 40% limestone.

It contains 33% recycled material such as WPC recovered from scraps and waste chips obtained in the manufacturing process, in which 60% renewable energy is used.

DIMENSIONS / PACKING

PANEL SIZE: 8 x120" (width / length)
4 pieces/box

CHARACTERISTICS

- Impact and abrasion resistance
- High fire resistance
- No cracking, chipping or spalling
- No additional treatment required
- Impervious to insects and bacteria
- 100% recyclable / eco-sustainable
- High durability
- Non-slip surface
- Low maintenance
- European manufacture
