- **Interior / Exterior use** Durability and 15 years guarantee.
- **Stock in the US** Quick delivery with no import lead times. **Made in Spain**

Main Features

IN&OUT

WATERPROOF

ECO-SUSTAINABLE

HIGH DURABILITY

QUICK AND EASY
TO INSTALL

INSECT AND FUNGUS
RESISTANT

RICE HUSK

Ecofiber Stone

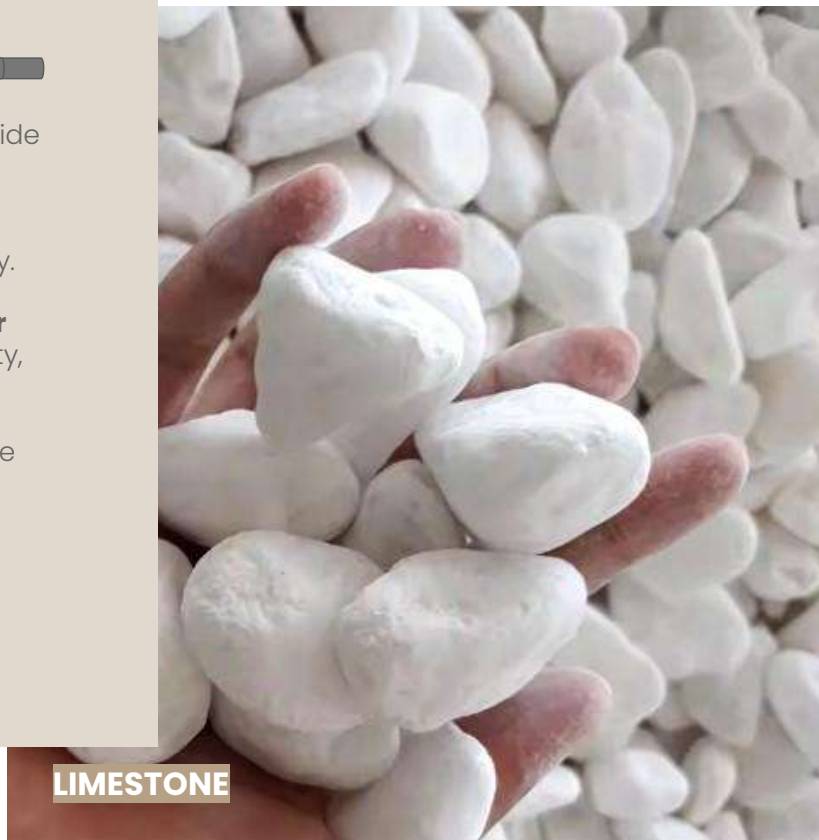

EcoFiber Stone is crafted as a **sustainable WPC** (Wood Plastic Composite), made from **renewable plant fiber** and **natural mineral components**.

90 parts of Natural Waste for 100 parts of Polyvinyl Chloride

- **50 parts of Rice Husk** – a **renewable fiber** from leftover husks, offering durability and sustainability.
- **40 parts of LIMESTONE** – the **fine powder left over** after marble processing, adding strength, durability, and natural fungicide benefits.
- **Polyvinyl Chloride (PVC)** – polymer with least use of petroleum derivatives, being a material 100% recyclable and reusable, adding durability and enhancing the material's sustainability and fire resistance.

LIMESTONE

A Product Recognized for Sustainability

EDP Certificatified for Environmental Commitment

A Environmental Product Declaration is an EU certification for:

- Sustainable Materials
- Sustainable Production
- Full lifecycle commitment to the environment:
 - Reducing, Reusing and Recycling

Environmentally committed

To turn waste into VALUE

Reduce

Minimize resource usage and **cut energy consumption** through renewable energy and efficient production processes

Reuse

All **manufacturing scraps** are **reintegrated** into the **production cycle**, ensuring that no materials are wasted.

Recycle

Every EcoFiber Stone product is designed to be **fully recyclable**, from profiles to accessories, **ensuring a sustainable lifecycle**.

Additionally, EcoFiber Stone **reuses elements like rice husk and marble powder**—materials that would otherwise be discarded— **Over 5 million kg of waste reused, transforming discarded materials into valuable decorative elements**.

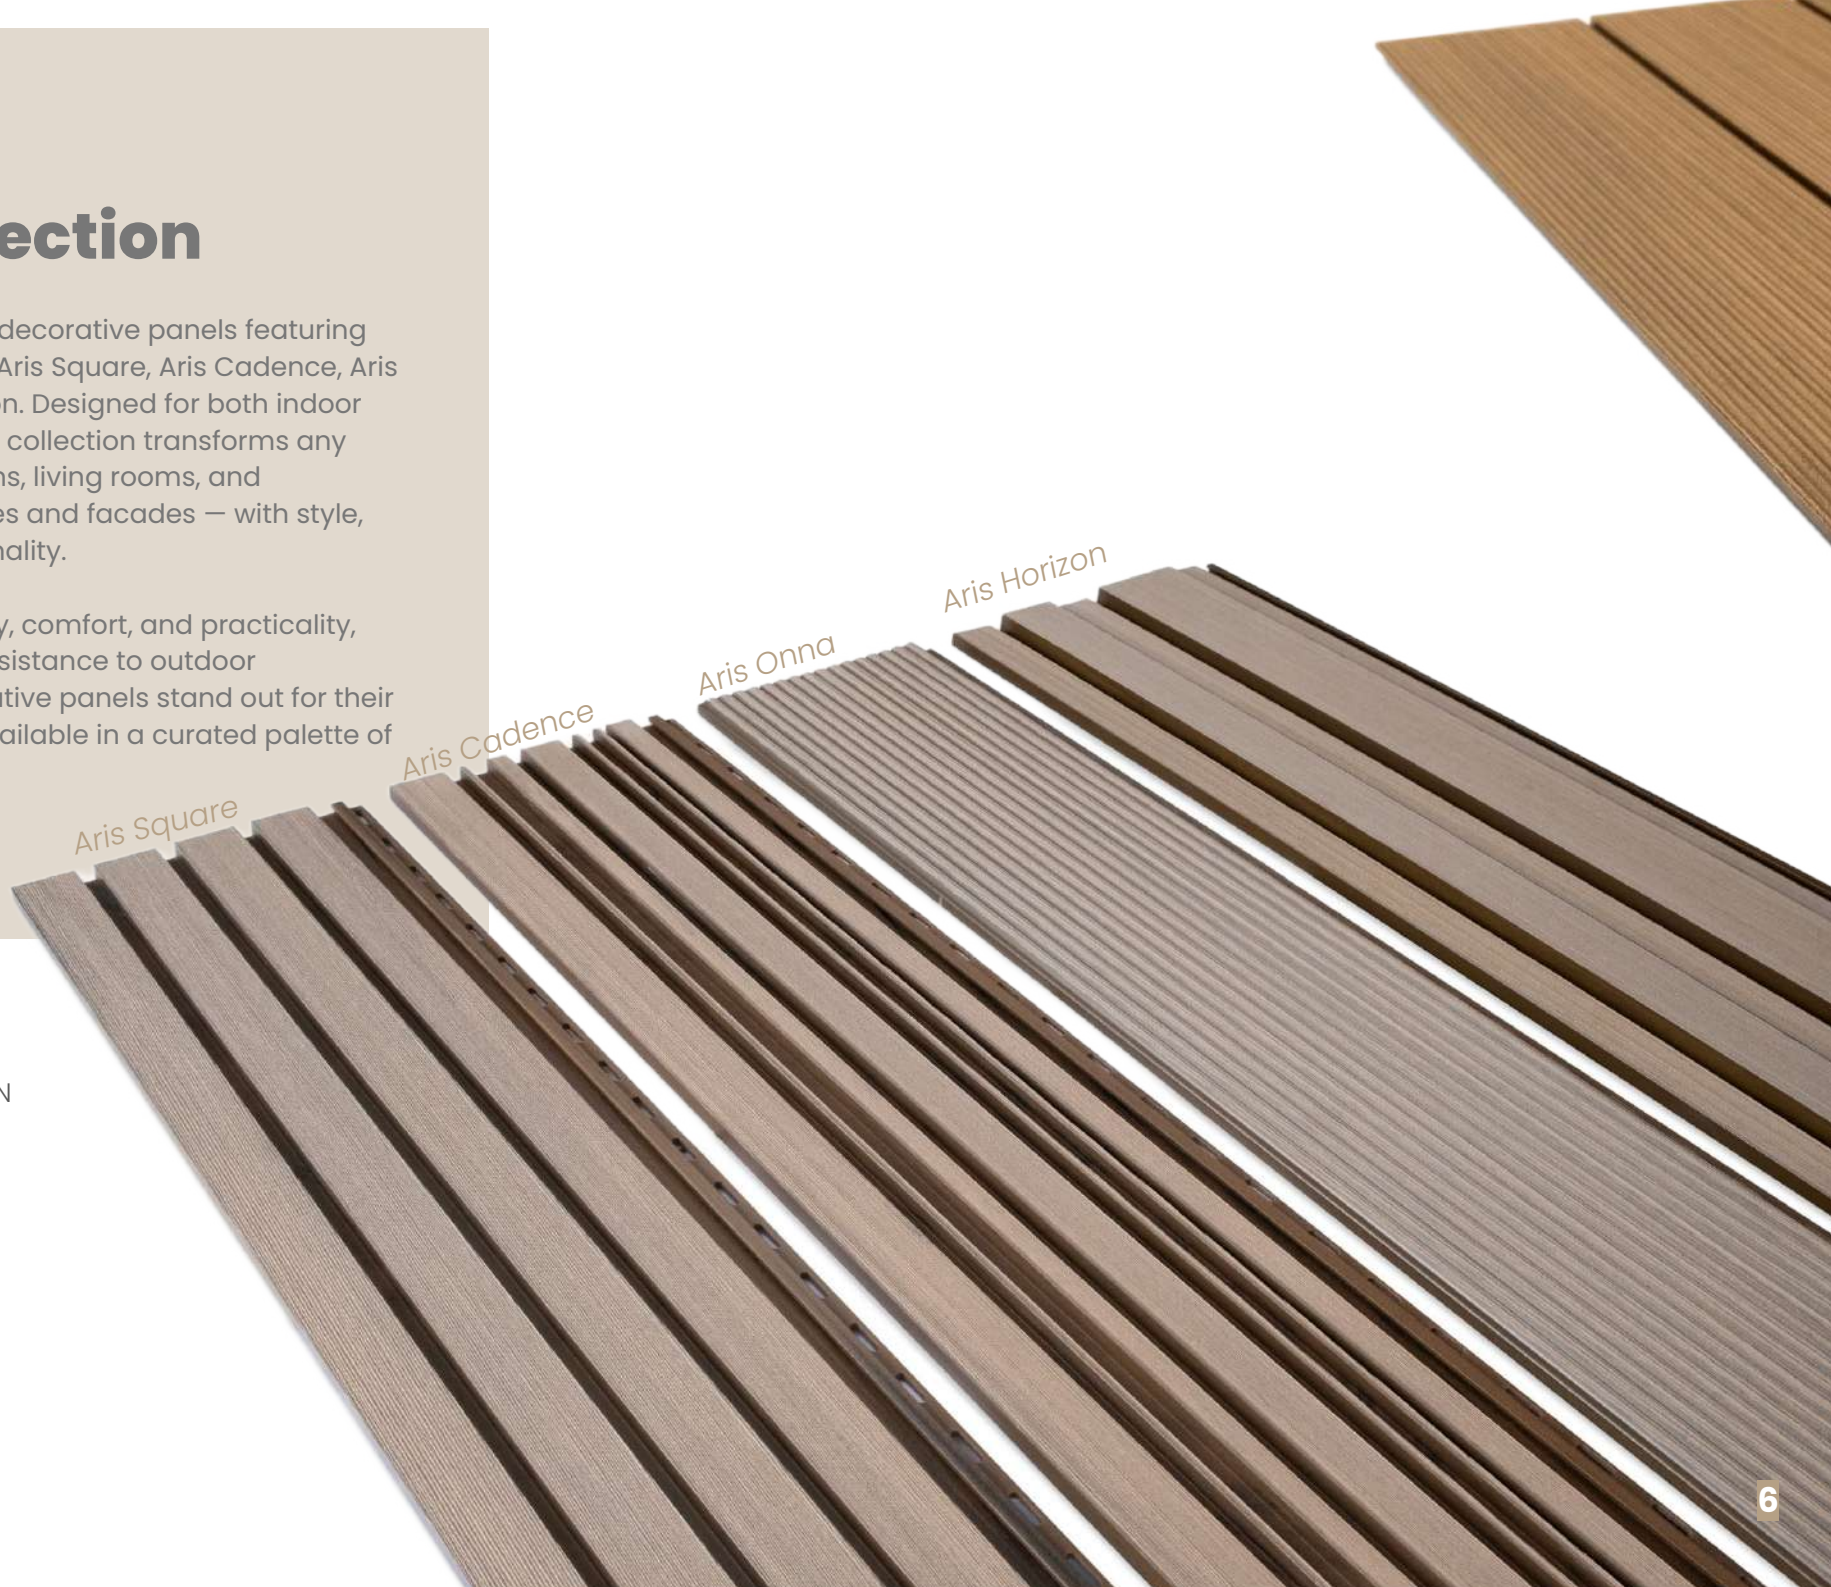

Aris Collection

Aris is a collection of decorative panels featuring four unique designs: Aris Square, Aris Cadence, Aris Onna, and Aris Horizon. Designed for both indoor and outdoor use, this collection transforms any space — from kitchens, living rooms, and bathrooms to terraces and facades — with style, warmth, and functionality.

Aris combines beauty, comfort, and practicality, while offering high resistance to outdoor conditions. Its decorative panels stand out for their versatility and are available in a curated palette of seven colors.

4 DIFFERENT PATTERNS
7 COLORS PER PATTERN
IN STOCK IN THE USA

Annapurna Collection

The Annapurna profile is the perfect solution for facades, fences, lattices, and visual partitions. Versatile and functional, it can be used to cover both walls and ceilings — indoors or outdoors — delivering a flawless finish for any architectural project.

Quick & Easy Installation Process.

Our decorative panels are engineered to install with ease — using modular rails, standard tools, and a clean, intuitive system.

No guesswork. No special training. Just professional results in less time.

you just need a system built with logic and precision.

- Aluminium profiles
- Step-by-step guide
- Standard tools only

Drill Driver

Hammer

Drill bits
3/16" and
3/8"

PH2 Bit

There are **three important points** to guarantee the durability and good performance of the product outdoors. Atmospheric conditions cause the panels to expand and contract when heated or cooled.

Battens

They must be made of aluminum.

Maximum batten center-to-center spacing 30"

Expansion joints

Respect expansion joints. Allow a 3/8" expansion joint at both the top and bottom of the panel.

Fastening screws

Important its placement, there are several ways.

- High Durability
- No Cracking, Chipping Or Peeling
- Quick & Easy Installation
- No Need For Additional Treatments
- Low Maintenance
- Unalterable Against Insects And Fungi
- European Production

Panel & More offers a range of decorative panels made from WPC (Wood Plastic Composite), providing a comprehensive solution for wall and ceiling cladding. The collection also includes versatile options like the Annapurna model, ideal for fences or even custom furniture design.

Thanks to their WPC composition, Panels & More's decorative panels are fully water-resistant and fire-retardant, offering superior technical performance compared to traditional MDF panels.

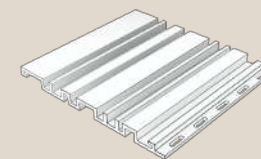

Easy and fast to install, with low maintenance and simple cleaning, these panels make renovation projects more efficient and cost-effective than those using other materials — all while delivering excellent insulation and long-lasting durability.
